PLATFORMS**

**STAINLESS STEEL
DISTRIBUTORS**

**SUPPORT TOWERS
PLATFORMS**

Ranco Bucket Elevators are built to last. One of the reasons they last, is our 4' tall trunk sections. They provide superior strength and stability because of the reinforcing angle flange every four feet. Our boot section is 5' tall on our single trunk legs and 6' tall on our double trunk legs. The boot utilizes heavy-duty pillow block bearings and self-cleaning tail rollers. Removable side panels allow for easy removal of the entire tail roller assembly.
