

# Bulk Bag Transfer System

STAINLESS OR MILD

LABOR SAVING

DUST REDUCING

HOPPER FEED OPTIONS

**T**he Ranco Bulk Bag Transfer System conveniently measures and transfers dry product from bulk bags into a fertilizer mixer or scale hopper. The unit sets adjacent to the mixer and transfers material directly into the hopper. The system can be controlled with either a manual switch or an electronic timer. Designed to deliver 1275# per minute of 90# product. A cone pallet allows easy access in low profile buildings and empties bag completely. The hopper pallet will allow for 'staging' of product and 'open-close' of gate for more control.

- Adapts to almost any system
- Saves labor
- Reduces dust
- Automatic measuring
- Mechanical or electronic timer
- Optional cone pallet
- Optional hopper pallet with stainless steel slide gate
