

Rotary Screener

MILD OR STAINLESS

VARIOUS SCREEN SIZES

OPTIONAL BRUSHES

DUST PANELS

The Rotary Screener from Ranco is a stationary unit designed to screen off oversized material and lumps from good product. The rotating action of the screener moves product from the inlet through the unit. The good product falls through the screen and the oversized product is discharged into a holding container located at ground level. Removable fiberglass panels contain the dust during operation as well as provide access to the screen for cleaning and maintenance.

- Mild steel or stainless steel hoppers
- Various screen sizes
- Optional screen cleaning brushes
- Dust panel enclosure
