

Twin Screw Car Unloader

STAINLESS OR MILD

SELF REGULATING

UP TO 90 TPH

TIRE TRANSPORT

The Ranco Twin Screw Car/Truck Unloader is designed as a portable unit for unloading rail cars or trucks. Overloading is eliminated because the twin-screw unloader automatically regulates the flow of material. The transport wheels are positioned to allow easy maneuvering under the truck or rail car. The capacity range is 45 to 90 TPH based on 60# material.

Ranco also manufactures a Single Screw Car Unloader that has a lower capacity that is sometimes desirable.

- Self-regulating design
- Stainless steel or mild steel pan
- Stainless steel or fiberglass incline tube
- Auger guard screen and sideboards
- Pneumatic or implement tires
- Optional wheel pivot mechanism
- Optional flow control gate to help dial in targeted capacity
- Affordable method to receive bulk product
